**Re: Transfer of Chambers Works HSWA Permit
ID # NJD002385730**

Dear Mr. Tjho:

In October 2014, we requested the transfer of the Hazardous and Solid Waste Amendments (HSWA) permit issued to the DuPont Chambers Works Site by the USEPA with an effective date of November 7, 1988, from DuPont to Chemours in accordance with condition I (F) (12) of the permit. Subsequently, we were informed in our April 16, 2015 meeting in Trenton that we should make a new request once the new entity was formally in existence as a stand-alone company. As of July 1, 2015 the Chemours Company FC LLC is a separate entity and the sole owner of the Chambers Works Site located at Shell Road, Route 130, Deepwater, New Jersey.

In accordance with condition I (F) (12) of the HSWA permit and 40 CFR 270.40 and 270.42, changes in ownership or operational control of the facility may be made as a Class I modification with prior written approval of the Director. Due to the transfer of the property from DuPont to Chemours, we respectfully request that the USEPA modify and reissue the HSWA permit identifying Chemours as the new permittee. As required by 40 CFR 270.40(b) enclosed is a copy of the written agreement for transfer of permit responsibility between the current permittee (DuPont) and the new permittee (Chemours).

Thank you for your immediate attention to this matter. If you have any questions, please feel free to contact me at (302) 773-4293.

Sincerely,

Edward J. Lutz, P.E.
Project Director, Chambers Works
Chemours Corporate Remediation Group
